

Pre-Delivery Guide

How to make delivery and installation
of your new Dynasty Spa fast, easy and trouble-free

GETTING READY FOR DELIVERY AND SET-UP OF YOUR SPA

This a checklist of CUSTOMER REQUIREMENTS AND RESPONSIBILITIES necessary for delivery and set-up of your new spa or swim spa.

DELIVERY AND SET-UP

1. The time required to set up your portable spa varies due to the complexity of each set-up. However 1 to 1 1/2 hours is usually the time required.
2. It is impossible for us to generate an exact arrival time. All deliveries and set-ups are timed approximately on delivery days by mornings or afternoons.
3. All spas must be paid in full prior to or at time of delivery, either by certified check, check, credit card or completed finance contract.

ACCESS REQUIREMENTS:

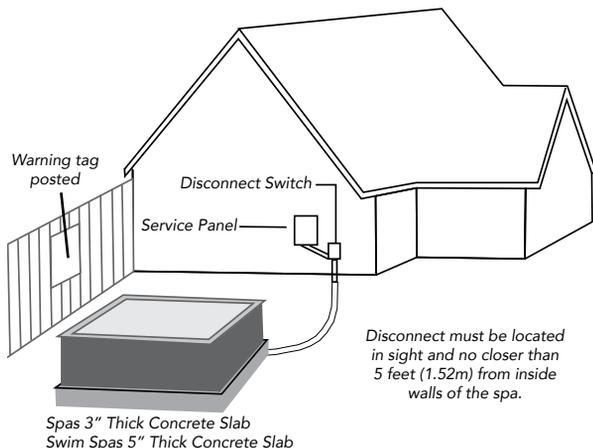

1. All portable spas require 48" of clearance through gate, between house and side fences, around corners and 10 feet of overhead clearance on level ground.
2. If we attempt to deliver and discover that a crane is necessary, or the yard is not fully prepared, there will be a charge on the second delivery, or waiting time. Customer pays for the crane services. Any crane delivery is the customers responsibility.
3. Swim Spas may result in additional delivery / installation charges. Swim Spas will require crane service.
4. All debris limiting or blocking access or on the set-up location, must be removed prior to delivery.
5. Delivery crew does not trim trees or bushes, remove debris or perform the general maintenance in order to set up spa.

SPA LOCATIONS

1. All portable spas must be set on a SOLID flat foundation; we recommend a thick 3" (5" thick for swim spas) concrete slab. All other foundations should be approved by a qualified contractor or engineer before use to insure warranties.
2. Any spa with water is very heavy, if the spa is placed on flooring or decking, be sure the structure is strong enough to support the weight. The necessary support should be at least 85 pounds per square foot.
3. In order to better service your spa, clearance for access to must be 38" (92cm) at equipment compartment and 24" (61cm) around the remaining area.
4. Position your spa so you can view the spa from your house.

IMPROPER INSTALLATION MAY RESULT IN EQUIPMENT DAMAGE AND WILL VOID THE WARRANTY, YOUR SPA MUST BE PLACED ON A FLAT SURFACE.

STORING CHEMICALS INSIDE YOUR SPA CABINET WILL VOID THE WARRANTY.

ELECTRICAL REQUIREMENTS:

1. ALL portable spa packs REQUIRE an ISOLATED: DEDICATED circuit. No other appliances or lights on this circuit at any time.
2. NO EXTENSION CORDS are to be used in conjunction with the operation of the spa. Low voltage damage could result, which is not covered by the warranty. All electrical must meet any local electrical codes.
3. All portable spas are required to be installed by a licensed electrician. OUR DELIVERY CREW DOES NOT CONNECT 110 VOLT OR 220 VOLT equipment packages. If you have any questions have your circuit checked by a qualified, licensed electrician.
4. All 110 Volt, 1.5 KW, packs require a minimal 15 AMP dedicated outlet.
5. All 220 Volt, 4.0 KW, equipment packs must use four approved gauge wires, directly into a 60-AMP double pole, single-throw breaker, GFCI directly hard-wired to equipment.

NOTE: Maximum footage on this electrical run should not exceed 100 ft. Approved gauge wire is needed over 100 feet of electrical run.

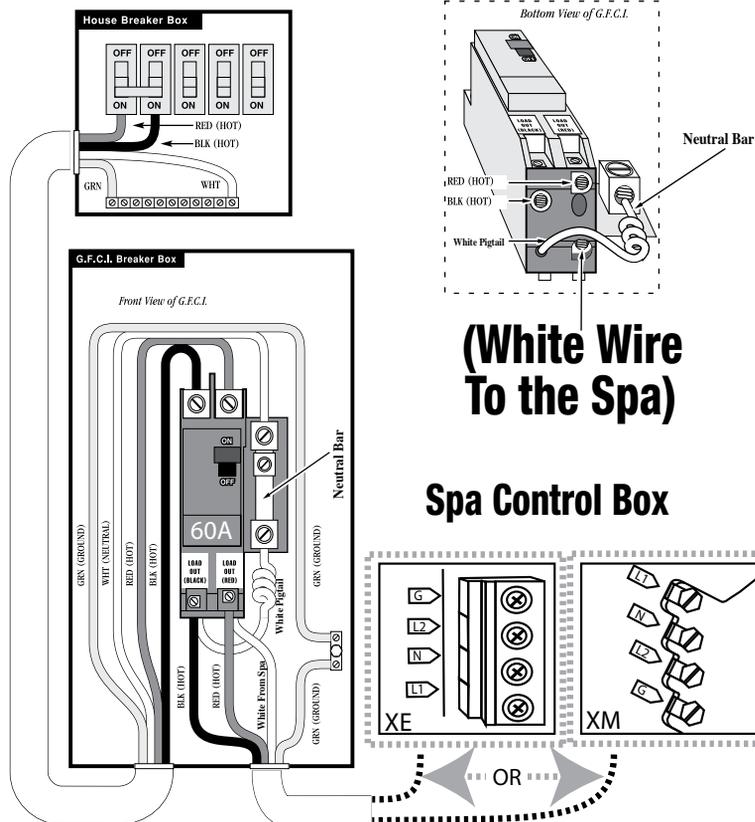

WIRING REQUIREMENTS:

Wiring Requirements

- 2-Hots, 1-Neutral, 1-Isolated Ground
- 0-40' length, 4 Wire #6 AWG minimum 75°C copper conductor
- Over 40' length, 4 Wire #6 AWG minimum 75°C copper conductor
(Check your local electrical codes for 60 Amp GFCI circuits for correct wire size for some areas vary)

Factory Recommended G.F.C.I. Load Center Wiring

Note: The white neutral wire from the back of the GFCI MUST be connected to an incoming line neutral. The internal mechanism of the GFCI requires this neutral connection. The GFCI will not work without it.

SPA SAFETY:

By learning and adhering to a few simple tips, you'll ensure an enjoyable spa experience for your friends and family.

- Maintain constant adult supervision when children are in or near ANY body of water.
- Install fences, barriers and spa covers to prevent unsupervised access, especially by young children.
- Always completely remove your spa cover before using your spa.
- Inspect your spa equipment on a regular basis to ensure that it is in good working order and that it is safe.
- Always test the temperature of your spa's water before entering the spa. It is recommended that maximum water temperature never exceed 104°F (40°C). Do not soak for more than 15 minutes at one sitting in 104°F (40°C) water.
- Individuals with certain medical conditions, such as heart disease, diabetes, high or low blood pressure, and pregnant women, should not use a spa without advance approval by their physician. If a person has any doubt as to whether a medical condition should limit their use of a spa, they should seek prior consultation with their physician. Individuals with open cuts or wounds should not use a spa until completely healed
- Never use a spa when you are alone and never use a spa while using or after using alcohol or drugs that may cause sleepiness, drowsiness, or raise or lower blood pressure.
- Ask your city about any specific rules and regulations that apply to spa ownership, including local electrical codes.
- Do not allow unsafe or risky behavior in and around the spa.
- Consult with a licensed electrician for installation of or any work to your spa. If you are installing your own spa, it is your responsibility that all work performed complies with the National Electrical Code and all other applicable codes and regulations.
- Your spa's jets, grates, skimmer and main drain should be properly maintained and secured. Spa users should be instructed not to stick any part of their body into such outlets as entrapment and drowning can occur. Spa users with long hair should also be cautioned not to get their hair near such outlets.
- Maintenance and safety manuals contain detailed tips and recommendations and should be read, followed and applied on a regular basis.
- We encourage all spa owners to request safety related publications from the Association of Pool and Spa Professionals (APSP), including: "The Sensible Way To Enjoy Your Spa or Hot Tub," and "Pool and Spa Emergency Procedures for Infants and Children." These APSP publications can be ordered from the APSP by calling or writing them at the APSP, 2111 Eisenhower Avenue, Suite 500, Alexandria, VA 22314, (703) 838-0083, or by visiting the APSP consumer Web site at www.theapsp.org .
